Slovakia – General information

CDCP starts providing services for the European Collateral Management System

16 June 2025

The Central Securities Depository of the Slovak Republic, a.s. (CDCP) has started providing services related to the operation of the Eurosystem Collateral Management System (ECMS) since 16 June 2025. CDCP maintains securities accounts for the purposes of collateral mobilisation, processes collateral mobilisation orders settled in TARGET 2 – Securities and ensures the processing of corporate events relating to securities held in relevant ECMS accounts. Within the ECMS, CDCP is also the source of data on individual collateral positions.

A new service that CDCP has started to provide since the launch of ECMS is the processing of the payment of proceeds and repayment of principal from securities that are eligible as collateral in Eurosystem credit operations and are held in ECMS relevant accounts. CDCP will process these corporate events in a harmonised manner according to the rules for collateral management in Europe, the SCoRE standards
