### ■ Revenues: decreasing after exceptional Q1 but higher on a yearly basis

- ✓ **F&A:** benefits from non recurring items. Normalized NII flat q/q and slightly lower y/y, mainly due to increasing funding costs
- ✓ **Markets:** trading profits on a more normalized basis after an exceptional Q1
- ✓ **GTB:** NII increase driven by higher spreads on sight deposits

### ■ Operating Expenses: up q/q due to seasonality, lower y/y

- ✓ **HR:** slightly decreasing both q/q and y/y
- ✓ **Non-HR:** up q/q because of seasonality, lower y/y

### ■ RWA: ongoing optimization on track

- ✓ **RWA eop decrease** (q/q and y/y)
- ✓ **Capital optimization** (e.g. roll out of advanced model) more than offset the increase in market risk triggered by the implementation of Group wide VaR methodology (historical simulation)

## Executive Summary – Private Banking

### ■ P&L results:

- ✓ **Revenues down (-2.9% q/q)** primarily due to lower sales commissions, mainly on AuM and Group bonds placement (after booming 1Q) partially offset by net interest double digit growth driven by higher spread on deposits
- ✓ **Revenues up on a yearly basis (+2.4%)** benefiting from interest rate recovery
- ✓ **Costs almost flat both q/q (+0.2%) and y/y (-0.7%). Cost/Income at 60.8%**
- ✓ **NOP and PBT down double digit q/q** affected by revenues drop

- **Ordinary<sup>(1)</sup> Financial Assets stable q/q**, with positive net sales (mostly in Italy, Germany and Luxembourg) balanced by negative performance effect

### ■ Commercial focus:

- ✓ **Deposits base increasing**
- ✓ **Ongoing positive trend of new advisory service “MyGlobe”** reaching 2.5 bn assets (+7.2% q/q, +16% YTD)

<sup>(1)</sup> Net of non ordinary assets, i.e. transactions which, due to their nature, large size and low profitability, are not considered ordinary operations (mainly institutional clients and company shares of business owners)
