<sup>6</sup> UniCredit Group 2022 financial guidance available in section "Group excluding Russia key financial 2022 guidance" at page 15.

<sup>7</sup> Macroeconomic slowdown for the UniCredit footprint updated to a GDP growth of 2.3 per cent in 2022 and 2.5 per cent in 2023, and inflation of 7.3 per cent in 2022 and 4.5 per cent in 2023. GDP and inflation growth of Group footprint are calculated based on a weighted GDP and inflation average of the respective countries (excluding Russia).

The quarter sets a number of records demonstrating the strong commercial momentum within the business. Excluding the impact of Russia, Group net profit was €1.5 billion, resulting in healthy organic capital generation of 67 basis points in the quarter resulting in a CET1 Ratio of 15.73 per cent.

Excluding Russia, the 2Q22 net revenues were €4.4 billion, 12.5 per cent higher year on year, reflecting high risk-adjusted returns across all regions, underpinned by the net interest income (“NII”) increase to €2.3 billion, and by lower Loan Loss Provision (“LLPs”), reflecting solid asset quality.

Excluding Russia, 2Q22 operational costs were reduced by 4.4 per cent year on year, demonstrating the Group’s discipline in managing the cost base while protecting revenue generation.

Russia exposure was reduced overall by circa €2.7 billion<sup>8</sup>, through proactive and disciplined actions, whilst Russia’s Risk Weighted assets (“RWAs”) were reduced by €2.7 billion. UniCredit is committed to maintaining a progressive de-risking approach.

The Group is well positioned and has the right foundations to enter a period of macroeconomic uncertainty given its strong CET1 ratio, enhanced business model with a capital light focus and solid asset quality. This is further strengthened by provisioning levels, existing overlays on performing exposures at circa €1.0 billion and a rigorous risk approach, strengthening the Group’s capacity to absorb macroeconomic shocks. Gross Non-Performing Exposures (“NPEs”) stood at €13.9 billion and are primarily composed of Unlikely-To-Pay (“UTP”) which will further benefit from the recently announced partnership agreement with Prelios in Italy for the specialised management of UTPs. Both Group Net and Gross NPE ratios continued to decline quarter on quarter, to 1.5 per cent and 2.9 per cent, respectively.

Cost of Risk (“CoR”), excluding Russia, is well below guidance at 10 basis points, and full year guidance is improved to below 30 basis points<sup>7</sup>.

On 14 July 2022, the 2021 first share buyback tranche of €1.6 billion, equivalent to 7.4 per cent of share capital has been successfully completed, and on 19 July 2022 the shares were cancelled. The Group intends to call for an EGM in 3Q22 for shareholder authorisation to increase the number of shares to be purchased for 2021 the second share buyback tranche of €1.0 billion<sup>9</sup>.

The Group’s 2Q22 CET1 ratio stood at 15.73 per cent, an improvement of 173 basis points quarter on quarter. This was mainly driven by organic capital generation of 67 basis points excluding Russia, and the positive impact from Russia of 62 basis points.

On the back of the strong financial results, and improved interest rate environment, UniCredit has improved its financial guidance for 2022<sup>7</sup>, with revenues above €16.7 billion and net profit at circa €4.0 billion, excluding Russia.

The UniCredit Unlocked 2024 financial ambitions of average annual organic capital generation of 150 basis points, incremental net revenue of circa €1.1 billion and a RoTE of circa 10.0 per cent are confirmed under the slowdown scenario with positive results already being delivered by combining the three levers of net revenues, costs and capital efficiency. The Bank continues its focus on the execution of the 2022-2024 Strategic Plan to fully unlock the value of UniCredit and is committed to delivering attractive and sustainable returns, with the ambition to return at least €16 billion to shareholders by 2024.

Key recent events include the following:

**Andrea Orcel, Chief Executive Officer of UniCredit S.p.A. :**

*“UniCredit continued to perform well in the second quarter, leading to the best first half performance in over a decade driven by profitable growth, healthy organic capital generation and a reduction of our cost base despite the impact of inflation. Our CET1 ratio further strengthened to 15.73 per cent as we demonstrated strong asset quality, with a Cost of Risk at just 10 basis points, excluding Russia. On the back of our excellent performance and a more supportive interest rate environment we have improved our 2022 guidance, an important step in the delivery of our three year plan.*

*The global economy is facing unprecedented challenges and much uncertainty. It is at times like this that our unwavering focus on delivering our UniCredit Unlocked strategy is especially critical. UniCredit is built on solid foundations, which position us well to navigate whatever macroeconomic environment lies ahead. **Note:**

Group excluding Russia net profit excludes the regulatory headwinds impact on CoR (-€85 m in 2Q21), real estate valuation (+€18 m in 2Q21); DTA write-up from TLCF (+€11 m in 2Q22), DTA write-off from TLCF (-€4 m in 2Q22). Furthermore, it is net by AT1 (-€136 m in 2Q21, -€149 m in 2Q22) and cashes charges (-€27 m in 2Q22). CET1 ratio corresponds to Group CET1 ratio including Russia.

**Total revenues** stood at €4.5 bn in 2Q22, down 6.8 per cent Q/Q with strong NII trend (+6.6 per cent Q/Q) offset by weaker quarterly trends in fees (-6.7 per cent Q/Q), and up 4.9 per cent Y/Y, with strong NII trend (+11.0 per cent Y/Y) and resilient trends in fees (+1.2 per cent Y/Y).

**Net revenues** reached €4.4 bn in 2Q22, down 8.1 per cent Q/Q and up 12.5 per cent Y/Y.

In 2Q22, **NII** stood at €2.3 bn, up 6.6 per cent Q/Q and up 11.0 per cent Y/Y. The Q/Q trend is positive in all divisions except Germany (due to the non-recurring item accounted for in 1Q22) and reflects enhanced commercial activity particularly in Italy and increased demand for credit, treasury and market activities as well as the days' effect. The Y/Y trend reflects positive trends in loans (higher volumes and upturn on rates), partially offset by deposits as affected by rate increases. Positive contribution also came from treasury, markets and term funding.

**Fees** normalised this quarter as expected, down 6.7 per cent Q/Q and delivered a sound performance at €1.7m, up 1.2 per cent Y/Y, demonstrating the positive diversification of our fee base. In particular:

- **Investment fees** generated €0.7 bn, down 10.8 per cent Q/Q due to lower AuM upfront fees, mainly in Italy and Management fees (impacted by negative Market effect) and partially offset by AUC (mostly certificates activity). Investment fees were down 8.0 per cent Y/Y mainly due to lower AuM upfront fees, lower sales primarily in Italy, partially mitigated by better AUC fees;
- **Financing fees** stood at €0.4 bn, down 11.2 per cent Q/Q which follow a strong commercial performance in 1Q22, with loan fees down mostly in Germany and Austria; financing fees were up 3.0 per cent Y/Y, driven by better loans, guarantees and CPI fees in Italy, mitigating for lower Global Capital Markets;
- **Transactional fees** were robust in 2Q22 and generated €0.6 bn, up 2.3 per cent Q/Q as a result of better card fees (primarily in Italy and Eastern Europe) and higher payment fees in Eastern Europe, up 12.8 per cent Y/Y, mainly driven by current accounts, better card fees and payment fees mainly in Italy, Germany and Eastern Europe.

**Trading income** has moderated, as expected, to €360 m in 2Q22, down 48.7 per cent Q/Q primarily due to non-client driven components such as €141 m from treasury and €174 m from strategic FX Hedging dividends and earnings; and down 7.4 per cent Y/Y driven by non-client driven components primarily due to Strategic FX Hedging dividends and a decrease in earnings mainly due to ruble hedging, partially offset by client-driven XVA.

**Operating costs** stood at €2.3 bn in 2Q22 remaining flat Q/Q, despite great inflationary pressure, and down 4.4 per cent Y/Y. In particular:

- **HR costs** were €1.4 bn in 2Q22, down 1.7 per cent Q/Q, supported by a decrease in staff expenses primarily in Germany and lower FTEs in Germany and Italy; and down 3.5 per cent Y/Y as a result of FTE decrease mainly in Germany and Italy;
- **Non HR costs** were €0.9 bn in 2Q22, up 2.6 per cent Q/Q, due to advisory and marketing costs as well as IT related expenses mainly supporting Digital investments and down 5.7 per cent Y/Y.

**CoR** stood well below guidance, at 10 bps in 2Q22, up 5 bps Q/Q and down 26 bps Y/Y. This was sustained by a continued positive development of the default rate, leading to low NPE inflows, as well as repayments on NPEs. At the same time, the Group maintained a broadly unchanged Q/Q amount of overlays on performing exposures at circa €1.0 billion, as new additional overlays, largely on energy intensive sectors, were set aside in 2Q22, offset by releases of prior overlays, substantially maintaining the Group's capacity to absorb any potential spill-over effects.

The 2Q22 **Group Stated Tax Rate** excluding Russia, stood at 21.6 per cent largely affected by deductions in Austria and by recognition of temporary deferred tax assets in Germany. At the same time, the 2Q22 Group Stated Tax Rate including Russia, stood at 18.6 per cent, thus benefitting from further deductions originated by 1Q22 Russia cross-border LLPs which positively impacted the 2Q22 tax burden in Italy.

**Net profit** stood at €1.5 bn in 2Q22, up 24.4 per cent Q/Q and up 66.6 per cent Y/Y.

**RWAs including Russia** stood at €316.7 bn in 2Q22, down 4.0 per cent Q/Q, driven primarily by a decrease in Credit RWA (-€13.5 bn), specifically thanks to active portfolio management (securitisations, dismissals) and positive effects from regulatory headwinds, and down 3.4 per cent Y/Y.

**RWAs, excluding Russia**, totalled €298.4 bn in 2Q22, down 3.4 per cent Q/Q, due to the RWA savings (-€5.6 bn) resulting from active portfolio management (securitisations, dismissals) and positive effects from regulatory headwinds (-€6.5 bn), and down 5.7 per cent Y/Y.

## ECONOMIC OUTLOOK

The latest economic indicators point to a deterioration in the economic outlook, especially for the manufacturing sector. Global GDP is expected to be impacted by the inflation that continues to move upside and monetary stimulus that is withdrawn globally.

In the euro area, economic activity is expected to be weak in the second half of the year, amid a slowdown in world trade, persistently high energy costs as a result of increasing uncertainty regarding energy supply and tightening financing conditions. Inflation will remain high until the end of the year and is then projected to show a clear deceleration throughout the course of 2023. In Italy, we expect a slowdown in private consumption growth as household purchasing power deteriorates, partly offset by the possibility of using excess savings accumulated during the pandemic to support spending. The increase in financing costs for the private sector will weaken domestic demand, particularly from 2023.

We expect the European Central Bank (ECB) to continue the rate tightening cycle that it began at its July meeting in order to counter the risk of a de-anchoring of inflation expectations. The anti-fragmentation tool announced by the ECB is expected to ensure the homogeneous transmission of monetary policy while the tightening cycle is implemented.

The outlook is surrounded by risks, mainly related to a cessation of gas supply from Russia.
